

The company

Climate Bridge is an international company devoted to reducing greenhouse gas emissions through the carbon markets. We develop, finance, and purchase carbon from projects from around the world.

The company was founded by Alex Wyatt (an ex-McKinsey consultant) and Dr Cameron Hepburn (a Fellow at Oxford University) and has grown rapidly since **2006**. We are entrepreneurial, friendly, and work hard towards our shared goal of reducing emissions.

We have around 40 professionals at our locations in **China** (Shanghai, Gansu, Henan, Hainan, Hunan, Hebei), **India** (Chennai) and the **United Kingdom** (London), and we are focused on continually developing new ways to reduce emissions through both the compliance and voluntary carbon markets.

Our projects to date include wind, hydro, energy efficiency, waste heat recovery, animal methane, landfill gas and coal mine methane emission reductions and ultra-super critical power generation.

PROJECT ANALYST

Your role

The IT Manager will work closely with our Business Manager to oversee **strategy, development, and operations** for our web-based carbon management systems. Uncompromising on **quality** but also sensitive to **commercial priorities**, the IT Manager will have **strong technical abilities** but will also be able to manage **external resources** to achieve business priorities.
